ATTN: Shail Khiyara, CEO

Hi Shail,

As an AgTech leader and farm owner, my experience directly resonates with the problems you are solving at SWARM. I have spent over two decades solving the operational challenges your customers face, from optimizing grain logistics and commodity distribution to modernizing the technology driving agriculture and chemical commodity supply chains.

I have directed the end-to-end product roadmap for multiple B2B SaaS platforms, including a data-intensive freight optimization product and TowFlow.ai, an AI-powered barge operations platform for ag and commodity trading enterprises. Throughout my career, I have led both product and engineering teams while serving as the primary executive face to customers. I translate real operational pain into scalable product decisions.

I served as General Manager of Product at Roger, a SaaS platform backed by Cargill, The Andersons, Scoular, and Koch, delivering grain logistics solutions for North America's largest ag enterprises, with my business line growing P&L by approximately 20% in under 12 months.

Through my consulting practice, I now lead AI and technical strategy, including agentic workflow deployments, for ag, commodity trading, and supply chain clients.

Thank you for your time and consideration. I look forward to discussing how my background directly aligns with SWARM's mission.

Sincerely,

Mara Jorgensen
