

MARA JORGENSEN

Insurance Domain Expert | AI Evaluation & Prompt Engineering

+1-712-898-2341 | mara.jorgensen@gmail.com | [LinkedIn](#)

Summary

Insurance domain expert and AI expert with 10+ years of experience spanning trucking/commercial auto, health insurance enrollment, and crop insurance. Hands-on AI/LLM expertise in prompt engineering, model evaluation, and rubric development. Led a trucking insurance compliance product from 0-1 that increased ARR by 20%. I bridge deep insurance knowledge (policy lifecycle, risk assessment, regulatory compliance) with technical AI capabilities to evaluate and improve AI model outputs for accuracy, bias, and compliance. Experienced collaborator with cross-functional teams including data science, engineering, and product.

Skills

Insurance Domain Expertise

- Trucking/Commercial Auto Insurance & FMCSA Compliance
- Health Insurance Enrollment & PHI Compliance
- Crop Insurance Risk Assessment
- Policy Lifecycle, Retention & Renewal Analysis
- Regulatory Frameworks & Compliance Documentation

AI Evaluation & Prompt Engineering

- Prompt Engineering & System Prompt Design
- Evaluation Rubrics & Golden Response Development
- Model Output Validation (Accuracy, Bias, Compliance)
- Data Annotation Guidelines & Quality Assurance
- Explainable AI Framework Design

Technical & Collaboration

- AI Tools: Azure AI Foundry, n8n, OpenAI, Claude, LLM Orchestration
- Python, SQL, API Integrations
- Cross-Functional Team Collaboration (Data Science, Engineering, Product)
- Data Analytics, Dashboards & Forecasting

Professional Experience

CEO, AI & Technical Implementation Strategist

Strategic Consulting Corp. | 1/2020 - Present

- **AI Application Development:** Build AI/LLM applications for insurance and enterprise clients, including health insurance enrollment and crop insurance risk assessment tools
- **Prompt Engineering & Evaluation:** Design system prompts, develop evaluation rubrics and golden responses, and validate model outputs against real-world insurance standards and compliance requirements
- **Model Evaluation:** Test AI outputs for accuracy, bias, and regulatory compliance, with particular focus on sensitive data handling (PHI, PII) in insurance contexts
- **Cross-Functional Collaboration:** Partner with data science teams to provide insurance domain context for model training and evaluation, ensuring outputs align with industry practices

Head of Freight Product & Customer Operations

Kontango | AI-powered chemicals commodity trading platform | 4/2023 - 12/2024

- **ML-Driven Product:** Owned end-to-end product roadmap for the freight platform, leading the integration of predictive ML models with the core trading application
- **Data Analytics & Forecasting:** Built dashboards and forecasting tools for executive stakeholders; used data analytics to drive decision-making and measure model performance

- **Cross-Functional Leadership:** Led engineering, data science, and commercial teams to rapidly ship features; defined success metrics aligned with business objectives

General Manager, Product Management [Integrations & Compliance]

Roger (JV of Cargill, Andersons, Scoular, Koch) | Enterprise logistics platform | 3/2020 - 3/2023

- **Trucking Insurance Product (0-1):** Led the compliance product team, building systems to validate carrier insurance compliance in real time; owned the full policy lifecycle from carrier onboarding through certificate verification and renewal tracking
- **FMCSA Integration:** Integrated with the Federal Motor Carrier Safety Administration to automate insurance documentation verification; required deep understanding of commercial auto policy structures and regulatory frameworks
- **Revenue Impact:** Increased annual recurring revenue by 20% within 12 months of product launch through insurance compliance features
- **Enterprise Compliance:** Ensured strict adherence to PII, CCPA, and SOC2 requirements; partnered with legal to ship compliant features

Partner, Director of Business Solutions

Fast Solutions | Enterprise software consultancy | 6/2013 - 1/2020

- **Technical Leadership:** Led product and engineering teams in designing and delivering complex integrations and platform implementations for enterprise clients
- **User-Centered Design:** Led user research and stakeholder interviews to inform product roadmaps; managed full product lifecycle from requirements to release
- **Enterprise Transformation:** Drove digital transformation by creating multi-year product roadmaps for integration and modernization projects

Business Analyst/Software Engineer

Tyson Foods | 7/2010 - 6/2013

- Acted as key liaison between business stakeholders across sales, manufacturing, and accounting
- Developed integrations that enhanced data flow between critical business systems

Software Developer

CF Industries | 4/2001 - 6/2010

- Engineered robust software solutions and integrations for enterprise manufacturing applications

Education

Masters in Management | Bellevue University, Bellevue, Nebraska

BS in Computer Science and Mathematics | Morningside University, Sioux City, Iowa
