

MARA JORGENSEN

AI & Technical Product Leader | Agriculture, Commodity Trading & Logistics
+1-712-898-2341 | mara.jorgensen@gmail.com | [linkedin.com/in/mara-jorgensen](https://www.linkedin.com/in/mara-jorgensen)

SUMMARY

With over 20 years in product leadership and engineering, I have built and scaled B2B SaaS platforms, including recent AI-powered platforms, at the intersection of agriculture, chemical commodity trading, and supply chain. I have directed the end-to-end roadmap for a data-intensive freight optimization platform and an AI-powered logistics operations product. I lead engineering teams, while serving as the primary executive face to our customers. As a lifelong farmer with deep roots in the industries SWARM serves, I bring the domain authority, technical fluency, and strategic range to lead ENGINE and AVA from roadmap to market leadership.

SKILLS

Product Strategy & Leadership

- Multi-Year Product Roadmap, Enterprise Strategy, P&L Ownership
- AI Product Lifecycle Ownership, AI Roadmapping
- Go-to-Market Execution, Sales Enablement
- Executive Advisory, "Build vs. Buy" Analysis
- OKR Framework, Agile Methodologies

AI & Agentic Intelligence

- Agentic Workflows & LLM Orchestration
- Predictive Analytics & ML Product Integration
- Rapid Pilot-to-Production Cycles
- Azure AI Foundry, OpenAI, n8n, Python

Industry & Domain Expertise

- Agriculture, Grain Logistics & Commodity Trading
- Bulk Supply Chain, TMS, ERP (SAP, Oracle, JDE, Agris)
- Chemicals Manufacturing & Distribution (Industrial)
- CTRM (Ion, Right Angle, Allegro)
- Logistics (Truck, Rail, Barge)

Execution & Engineering Leadership

- Full Product Lifecycle (0-1 + Enterprise)
- Product & Engineering Team Leadership
- Customer Discovery, UAT, A/B Testing
- Cross-Functional Team Leadership

PROFESSIONAL EXPERIENCE

Strategic Consulting Corp. | CEO, AI & Technical Implementation Strategist

Premier boutique consultancy delivering AI strategy and agentic automation for enterprise agriculture, commodity trading, and logistics | Jan 2020-Present

- Accelerated AI Framework:** Developed and executes a 3-phase framework (assess, prototype, operationalize) to deliver AI and agentic workflow solutions from pilot to production for enterprise ag and supply chain clients.
- Executive Advisory:** Consults with C-suite leaders across agriculture and logistics to identify high-value AI use cases, define multi-year AI product roadmaps, and navigate complex "build vs. buy" decisions.
- Agentic Deployment:** Architects and deploys predictive AI engines and agentic automation leveraging Azure AI Foundry, OpenAI, and n8n, coaching engineering teams on modern AI tooling and LLM orchestration.

Kontango | President, Head of Freight Product and Customer Success

B2B SaaS freight intelligence platform for agriculture and commodity trading | Apr 2023-Dec 2024

- Product Roadmap Leadership:** Directed the end-to-end product roadmap for a data-intensive freight optimization platform and TowFlow.ai, an AI-powered barge operations SaaS platform, leading discovery, prioritization, and delivery in close partnership with engineering and data science teams.
- ML-Driven Market Intelligence:** Owned the roadmap for predictive ML integration in freight market analysis, driving requirements and data mapping with the CEO and accelerating customer adoption through rapid pilot-to-production cycles.
- Customer Operations:** Owned all customer operations, providing end-to-end onboarding, success management, and CXO-level advisory to enterprise agriculture and commodity trading customers.
- Engineering Partnership:** Served as the primary bridge between business requirements and technical execution, leading cross-functional engineering and data science teams to deliver scalable, data-driven product features.

Roger | General Manager, Product Manager (Compliance and Integrations)

B2B SaaS grain logistics platform (JV: Cargill, The Andersons, Scoular, CGB, Koch) | Mar 2020-Mar 2023

- Platform Growth:** Owned P&L for the compliance product line, launching onRamp and increasing platform revenue ~20% in under 12 months by streamlining carrier onboarding for agriculture and grain logistics enterprises.

- **Cross-Functional Leadership:** Led cross-functional teams of onshore and offshore engineers and designers, establishing OKRs and KPIs to align product performance with measurable business outcomes.
- **Customer Discovery:** Led continuous discovery sessions with agriculture business stakeholders across five of North America's largest ag enterprises, translating grain logistics and compliance challenges into prioritized product capabilities.

Fast Solutions | Partner, Director of Business Solutions

Enterprise technology consulting serving agriculture, commodities, and logistics | Jun 2013-Jan 2020

- **Enterprise Transformation:** Drove multi-year product and technology roadmaps for enterprise ag and commodity trading clients, modernizing legacy ERP and mainframe systems to modern platforms including SAP and Oracle.
- **Domain Leadership:** Served as the primary technical consultant and domain expert, delivering TMS, CTRM, and custom integrations for grain trading, chemicals manufacturing, and bulk logistics operations.

Tyson Foods | Business Analyst / Software Engineer | Jul 2010-Jun 2013

- **Supply Chain Integration:** Key liaison between business stakeholders across sales, manufacturing, and logistics, defining requirements for ERP and mainframe integrations within a highly regulated protein and food supply chain.

CF Industries | Software Developer / Security Analyst | Apr 2001-Jun 2010

- **Agricultural Chemicals Systems:** Engineered robust software solutions and SAP integrations for the leading agricultural chemicals manufacturer, building foundational expertise in ag commodity systems and enterprise compliance.

EDUCATION

Masters in Management | Bellevue University, Bellevue, Nebraska

BS in Computer Science and Mathematics | Morningside University, Sioux City, Iowa
