

MARA JORGENSEN

AI Product Leader | Enterprise Platforms & Agentic AI
+1-712-898-2341 | mara@strategic-corp.com | [LinkedIn](#)

Summary

Technical Product Leader with 20+ years building enterprise platforms, now focused on AI-driven products. Expert at taking products from 0-1, leading cross-functional teams through ambiguity to deliver customer value. I combine hands-on technical depth (Python, APIs, LLM orchestration) with strategic product vision to build AI agents and platforms that solve real business problems. Passionate about customer obsession: deeply understanding user needs and iterating rapidly to deliver excellent experiences.

Skills

AI & Agentic Product Leadership

- Agentic Workflows & LLM Orchestration
- AI Roadmapping (90-day and beyond)
- Rapid Pilot-to-Production Cycles
- AI Product Lifecycle Ownership
- Responsible AI Posture

Product Strategy & Execution

- 0-1 Product Launches
- Enterprise Product Strategy
- P&L Ownership
- User Discovery, A/B Testing, Customer Flows
- MVP Definition & Prioritization

Technical & Platform

- APIs, SDKs, & Developer Tooling
- Python, SQL, Integration Architecture
- AI Tools: OpenAI, Claude, Cursor, v0, agents, workflows
- Cross-functional Engineering Leadership

Professional Experience

CEO, AI & Technical Implementation Strategist

Strategic Consulting Corp. | 1/2020 – Present

- **AI Framework Development:** Developed and executes a 3-phase framework to move enterprise clients from concept to functional AI pilot, validating core business assumptions quickly
- **Agentic Engineering:** Leverages a "next-gen" tech stack including AI coding assistants and agentic workflows to deliver functional pilots at a fraction of traditional engineering time and cost
- **Executive Advisory:** Consults with executives to identify AI use-cases that provide immediate value (ROI, efficiency gains, customer experience improvements)
- **Technical Bridge:** Represents engineering and data needs in executive settings, translating complex technical concepts for business stakeholders

Head of Freight Product & Customer Operations

Kontango | AI-powered chemicals commodity trading platform | 4/2023 – 12/2024

- **ML-Driven Product:** Owned end-to-end product roadmap for the freight platform, leading the integration of predictive ML models with the core trading application
- **Customer Obsession:** Drove rigorous discovery research, A/B testing, and customer journey analysis to define MVP concepts that maximized ROI for freight users
- **Cross-Functional Leadership:** Led engineering, data science, and commercial teams to rapidly ship features; served as primary customer-facing advisor to executive stakeholders

- **Rapid Prototyping:** Leveraged AI coding assistants to rapidly engineer and deploy solutions, accelerating the feedback loop with customers

General Manager, Product Management [Integrations & Compliance]

Roger (JV of Cargill, Andersons, Scoular, Koch) | Enterprise logistics platform | 3/2020 – 3/2023

- **0-1 Platform Launch:** Owned P&L for two product lines (Integrations and Compliance); led the design and launch of onRamp, a secure B2B onboarding platform—increased revenue by ~20% within 12 months
- **Developer Platform:** Spearheaded iPaaS selection and implementation to scale B2B integrations, conducting market analysis and securing executive buy-in
- **Continuous Discovery:** Led discovery sessions with enterprise stakeholders to translate user needs into detailed technical requirements and user stories
- **Cross-Functional Execution:** Partnered with engineering, design, and legal to ship compliant features; led onshore and offshore engineering teams

Partner, Director of Business Solutions

Fast Solutions | Enterprise software consultancy | 6/2013 – 1/2020

- **Technical Leadership:** Led product and engineering teams in designing and delivering complex integrations and platform implementations for enterprise clients
- **User-Centered Design:** Led user research and stakeholder interviews to inform product roadmaps; managed full product lifecycle from requirements to release
- **Enterprise Transformation:** Drove digital transformation by creating multi-year product roadmaps for integration and modernization projects

Business Analyst/Software Engineer

Tyson Foods | 7/2010 – 6/2013

- Acted as key liaison between business stakeholders across sales, manufacturing, and accounting
- Developed integrations that enhanced data flow between critical business systems

Software Developer

CF Industries | 4/2001 – 6/2010

- Engineered robust software solutions and integrations for enterprise manufacturing applications

Education

Masters in Management | Bellevue University, Bellevue, Nebraska

BS in Computer Science and Mathematics | Morningside University, Sioux City, Iowa
