

MARA JORGENSEN

AI Strategy & Digital Transformation Leader | AgTech, Logistics & Commodities Trading

+1-712-898-2341 | mara@strategic-corp.com | [LinkedIn](#)

Summary

Technical Product Leader and AI Strategist specializing in modernizing technical platforms for agriculture, commodities trading, and logistics executives. This includes de-risking AI investments by bridging the gap between “AI hype” and industry reality. I lead teams to rapidly move from concepts to usable solutions that drive business impact. Expert at identifying high-ROI use cases across the agriculture and commodities supply chain, I combine deep industry knowledge with an agentic tech stack to outpace traditional engineering teams. Extensive experience aligning technical innovation with regulatory, security, and compliance considerations in global environments.

Skills

AI Product Strategy & Leadership

- AI Roadmapping (90-day and beyond)
- Executive Advisory on Technical Initiatives
- “Build vs. Buy” Economic Analysis
- AI Product Lifecycle Ownership
- Responsible AI Posture
- AI Best Practices Mentor
- Enterprise Product Strategy

AI Implementation

- Agentic Workflows
- LLM Orchestration (Azure AI Foundry, OpenAI)
- Rapid Pilot-to-Production Cycles
- Predictive Analytics
- AI-Driven Market Targeting

Industry & Tool Expertise

- **Industry Expertise:** Agriculture & AgTech, Commodities Trading, Global Logistics & Freight, Insurance & Compliance
- **AI & Automation:** Azure AI Foundry, n8n, OpenAI/ChatGPT, Claude, Gemini, Perplexity, Cursor, v0, Bolt, agents, workflows
- **Data, AI Infrastructure, & ML Tools:** Python, SQL, APIs, iPaaS, ETL, Knowledge Retrieval (RAG), Vector Database Strategy, Data Stubbing & Feasibility Testing
- **Digital Transformation:** Legacy System Modernization (ERP, SAP, Oracle), Predictive Analytics, Data Warehousing, BI

Professional Experience

CEO, AI & Technical Implementation Strategist at Strategic Consulting Corp. | 1/2020 to present

- **Accelerated AI Framework:** Developed and executes a 3-phase framework to move enterprise leaders to a functional AI pilot, bypassing bottlenecks to validate core business assumptions quickly
- **Next-Gen Engineering:** Leverages a “next-gen” tech stack including automated engineers and coding tools to deliver logic and functional pilots at a fraction of the time and cost of traditional engineers. Deploys predictive AI engines for high-value client use cases, such as market optimization or customer service
- **Executive Advisory:** Consults with executives to identify AI use-cases that provide immediate value (ROI, increased profitability, cost savings, or efficiency gains)
- **Digital Transformation Leadership:** Spearheads the development of multi-year product roadmaps integrating modern technologies, including AI/ML for predictive analytics, into existing enterprise ecosystems to enhance customer value and profitability
- **“Build vs. Buy” Analysis:** Leads executive stakeholders through complex “build vs. buy” decisions, providing rigorous economic analysis and strategic recommendations

Head of Freight [Product] and Customer Operations at Kontango | International chemicals commodity market intelligence & trading platform | 4/2023 to 12/2024

- **ML-Driven Market Intelligence:** Owned the product roadmap for the freight platform, leading the integration of a new predictive machine learning for freight optimization that blended SaaS with domain-specific data
- **Strategic Product & Customer Operations Leadership:** Served as the primary customer-facing advisor to executive stakeholders, collaborating closely with the CEO to make strategic product decisions for the platform. Owned end-to-end customer operations

- **Customer-Centered Innovation:** Drove rigorous discovery and customer journey analysis to quickly deploy MVP concepts, prioritizing engagement and ROI for trader customers

General Manager, Product Management [Compliance and Integrations] at Roger (JV of Cargill, The Andersons, Scoular, CGB, & Koch) | Agricultural bulk freight trucking movement, compliance, & marketplace | 3/2020 – 3/2023

- **Platform Launch & Growth:** Owned P&L, led the design and launch of onRamp, a secure onboarding platform for logistics partners, increasing revenue by ~20% within the first 12 months
- **Enterprise Compliance:** Ensured strict adherence to PII, CCPA, and SOC2 standards while integrating with the US government and insurance data sources to automate partner verification
- **Cross-Functional Leadership:** Partnered with engineering, design, and legal to plan for data segregation and retention policies, ensuring sensitive carrier and insurance data remained isolated from identifiable user information
- **Customer Champion:** Led continuous discovery with business stakeholders and customers to identify high-value use for logistics platform features

Partner, Director of Business Solutions at Fast Solutions | Technical firm specializing in enterprise systems for medium-large agricultural and construction clients | 6/2013 – 1/2020

- **Deep Domain Expert (Ag, Commodities, Logistics):** Served as the primary expert for business stakeholders, translating their needs into technical requirements for enterprise modernization initiatives
- **Modernization Strategy:** Drove enterprise digital transformation by creating, and executing, multi-year product roadmaps for integration and platform modernization projects
- **Technical Leader, Implementations and Integrations:** Led product and engineering teams in complex ERP integrations and implementations (including SAP) for ag and commodities clients. Managed the entire product lifecycle and engineering teams, from initial requirements gathering and scope definition to coordinating UAT, and final product release

Business Analyst/Software Engineer at Tyson Foods | 7/2010 – 6/2013

- Acted as the key liaison between business stakeholders across sales, manufacturing, and accounting
- Developed systems that enhanced data flow between critical business systems, directly improving a complex ag systems
- Designed integrations and reporting platforms for highly regulated USDA reporting

Software Developer/Security Analyst at CF Industries | 4/2001 – 6/2010

- Engineered robust software for the leading agricultural chemical manufacturer, focusing on business-critical applications in SAP and ensuring data integrity
- Led risk analysis, remediation, and mitigation for Sarbanes/Oxley (SOX) compliance as a CISSP, ensuring robust security and regulatory adherence

Education

Masters in Management | Bellevue University, Bellevue, Nebraska

BS in Computer Science and Mathematics | Morningside University, Sioux City, Iowa
