

MARA JORGENSEN

Data Strategy & AI Leader | ETRM/CTRM & Commodity Trading
+1-712-898-2341 | mara.jorgensen@gmail.com | linkedin.com/in/mara-jorgensen

SUMMARY

With over 20 years of experience in agriculture, commodity trading, and logistics systems, I provide data strategy, roadmaps, and strategic guidance for complex trading and logistics environments. I translate ETRM/CTRM workflows into governed data architectures and analytics-ready data products. Over the past two years, I have expanded into enterprise AI strategy, bringing AI readiness assessments and governed AI orchestration to commodity trading and supply chain clients.

SKILLS

Data Architecture

- Source-to-Target Design
- Data Domain Modeling
- Data Product Design
- Analytics Use Case Development

ETRM/CTRM Domain

- Trades, Positions, Prices, Settlements
- ERP Financial Integration
- Commodity Trading Operations

AI Readiness

- AI Governance Frameworks
- Governed Data Consumption Patterns
- Prompt-Safe Data Boundaries
- AI Use Case Backlog Development

Architecture Delivery

- Practical Delivery Roadmaps
- Executive Advisory
- Regulated Environment Delivery

PROFESSIONAL EXPERIENCE

Strategic Consulting Corp. | CEO, AI & Technical Implementation Strategist

Premier boutique consultancy delivering data architecture, AI strategy, and agentic automation for enterprise commodity trading and logistics | Jan 2020-Present

- **Data Architecture & Roadmap Delivery:** Delivers data architecture assessments for commodity trading and supply chain clients, producing implementation roadmaps.
- **Executive Advisory:** Consults with C-suite leaders across commodity trading and logistics to define AI readiness programs and practical build vs. buy strategy for data infrastructure.
- **AI Governance & Orchestration Design:** Conducts thorough governance discovery with enterprise clients to assess current data access patterns, then delivers a tailored AI guardrail framework and governed consumption model for safe, controlled AI deployment.
- **Agentic AI Deployment:** Architects and deploys agentic workflows for enterprise clients, moving initiatives from pilot to production using modern AI tooling.

Kontango | President, Head of Freight Product and Customer Success

B2B SaaS freight intelligence platform for commodity trading and agriculture | Apr 2023-Present

- **Data Platform Architecture:** Directed the end-to-end product roadmap for a data-intensive, ML-powered freight optimization platform, defining data domains and governed analytics consumption patterns for operational reporting.
- **Source System Integration:** Owned the mapping and ingestion of data across the freight platform's source systems, establishing data domain ownership, refresh cadence, and consumption patterns.
- **ML Analytics Ownership:** Led engineering and data science teams to integrate predictive ML into the platform, owning data product requirements from pilot through production.
- **Data Mapping & Requirements:** Led data mapping requirements with the CEO and business stakeholders, aligning commercial data flows with the platform's domain architecture.

Roger | General Manager, Product Management (Compliance and Integrations)

B2B SaaS grain logistics platform (JV: Cargill, The Andersons, Scoular, CGB, Koch) | Mar 2020-Mar 2023

- **Integrations Team Leadership:** Managed the integrations team, owning the architecture and delivery of over a dozen connected system integrations for enterprise agriculture logistics clients.
- **Integration Architecture:** Defined integration mapping and data movement requirements across multiple enterprise systems, establishing movement logic for the grain logistics platform.
- **Data Product Requirements:** Led discovery with enterprise stakeholders from five of North America's largest ag enterprises, translating complex logistics workflows into structured data product requirements.

- **Compliance & Data Governance:** Partnered with legal, security, and compliance teams to establish data privacy controls, regulatory adherence, and access governance across all platform integrations.
- **Cross-Functional Leadership:** Led cross-functional teams of 30+ onshore and offshore engineers and designers through full delivery cycles, from requirements definition through UAT and production release.

Fast Solutions | Partner, Director of Business Solutions

Enterprise technology consulting serving commodity trading, agriculture, and logistics | Jun 2013-Jan 2020

- **ETRM/CTRM Domain Architecture:** Served as the primary technical consultant and domain expert for ETRM/CTRM environments, delivering data architecture and integration roadmaps for grain trading and chemicals manufacturing clients.
- **ERP Financial Integration:** Led ERP implementation and integration efforts at enterprise commodity trading clients, defining data movement logic and accounting data mappings connecting trading systems to financial platforms.
- **Global Risk Position Servers:** Led teams that delivered global risk position servers and enterprise reporting platforms for commodity trading clients, spanning full implementation and configuration.
- **Analytics & Reporting Delivery:** Directed delivery of enterprise analytics and reporting solutions for commodity trading clients, owning both the technical design and configuration.
- **Commodity Trading Domain:** Served as the primary domain expert for commodity trading operations, with specialization in risk management, hedging, settlement, and procure-to-pay workflows for trading desk clients.

Tyson Foods | Business Analyst / Software Engineer | Jul 2010-Jun 2013

- **Supply Chain Integration:** Key liaison between business stakeholders across sales, manufacturing, and logistics, defining requirements for ERP and mainframe integrations within a highly regulated protein and food supply chain.
- **Reporting & Analytics:** Built reporting and analytics platforms to support operational decision-making across supply chain, procurement, and logistics functions within a Fortune 100 environment.

CF Industries | Software Developer / Security Analyst | Apr 2001-Jun 2010

- **Agricultural Systems & Compliance:** Engineered enterprise software and ERP integrations for the leading agricultural chemicals manufacturer, building foundational expertise in commodity trading systems, data governance, and regulatory compliance.
- **Enterprise Commodity Systems:** Engineered software solutions for the leading agricultural chemicals manufacturer, building foundational expertise in enterprise trading systems, hedging workflows, and operations data architecture.

EDUCATION

Masters in Management | Bellevue University, Bellevue, Nebraska

BS in Computer Science and Mathematics | Morningside University, Sioux City, Iowa
